

Private Boat Launch

If you do not have a support boat, to tow your raft up to the start, use this private boat launch. It's ¼ mile upriver from the racecourse start. Rafts can be paddled across to the adjacent shore while floating downriver to the starting area. This ramp is most suitable for launching smaller rafts due to the steep incline of the ramp. Parking is limited so you will need to move your vehicle out to a public road and/or back to the finish area. Please show the land owner the utmost respect and follow any instructions that are given.
